

# Shawkatul Islam Nabil

01951202030 | shawkatul25@gmail.com | github.com/Shawkatul-Nabil

## PROFESSIONAL SUMMARY

---

Third-year Computer Science and Engineering student (BUBT, expected graduation 2028) who independently designs and ships full applications across mobile, desktop, and embedded/computer-vision domains. Founder of a small hardware-reselling business with custom internal management software.

## TECHNICAL SKILLS

---

- Languages: Python, C++, C, Dart, SQL, HTML, CSS
- Mobile: Flutter, Riverpod, Supabase, offline-first architecture
- Desktop: PyQt, MySQL
- AI / Computer Vision: YOLOv8, OpenCV, model training & evaluation
- Embedded: ESP8266, sensor/hardware integration
- Databases: MySQL, MongoDB, Supabase
- Tools: Git, GitHub, VS Code, Code::Blocks, WordPress
- Core competencies: Data Structures & Algorithms, Competitive Programming

## PROJECTS

---

### MFC Pulse *Flutter · Dart · Riverpod · Supabase*

- Solo-designed and built a POS and admin dashboard app for a food-and-beverage business; initially prototyped in Python/Flet, then rebuilt in Flutter for production.
- Implemented offline-first local storage with background sync to Supabase, plus an integrated ratings/feedback system across POS and admin dashboard.

### SetupBase *Flutter · Supabase*

- Founded and operate a computer-components and phone-accessories reselling business, running for several months.
- Designing and building an internal Flutter + Supabase system to manage catalog, vendor, and order tracking.

### YoRHa 2B: Detachment From Distractions *Python · YOLOv8 · OpenCV · ESP8266*

- Independently designed and built a combined hardware/software system to detect phone-related distraction during focus sessions (submitted as a university group project, built solo).
- Trained a YOLOv8 phone-detection model (~0.97 mAP50 by epoch 30 on an initial small-scale dataset) and integrated it with an ESP8266 hardware unit for real-time alerts.

### NexusCare+ *Python · PyQt · MySQL*

- Solo-built a desktop pharmacy/healthcare management app connecting doctors and pharmacies directly to reduce prescription-reading errors and lost prescriptions.
- Designed the MySQL schema and built the PyQt interface end-to-end; complete and stable.

### ZombieRush / DeadRun *C++ · Java (Swing)*

- Built ZombieRush, a console-based C++ arcade survival game, for a university software development project, iterating across three versions.
- Rebuilt it as DeadRun in Java with a full Java Swing GUI, menus, and difficulty settings, replacing the terminal-based original.

## OTHER

---

- Designed and deployed goochelaar.nl, a custom WordPress client site, as part of a two-person development team.

## EDUCATION

---

### Bangladesh University of Business and Technology (BUBT), Dhaka

B.Sc. in Computer Science and Engineering — 3rd year, expected graduation 2028 | CGPA: 3.33/4.00

- Relevant coursework: Artificial Intelligence, Computer Vision, Microprocessors & Embedded Systems, Database Systems, Algorithms & Data Structures

Tejgaon College, Dhaka — HSC, 2021–2023, GPA: 4.00/5.00

Tejgaon Government High School, Dhaka — SSC, 2021, GPA: 4.71/5.00

## ACHIEVEMENTS & ACTIVITIES

---

- Solved 150+ algorithmic problems on Codeforces and LeetCode over one year.
- Contestant, BUBT Intra-University Programming Contest (BIUPC 24–25).
- Member, BUBT IT Club and BASIS Students' Forum.
